your paid calls

From the platform + your own network

Your calls come from 2 places

ConsultEase Users

People browsing the app for consultants in your category

They can find you instantly and call — even as a first-time visitor

Your Own Network

Clients, contacts and followers who already trust you

They just need a faster, easier way to actually pay for your time

Use both. That's how you win.

How users find you

01

Categories

Users browse by expertise — being in the right category is your first filter. Choose all categories that match your work.

02

Your Profile

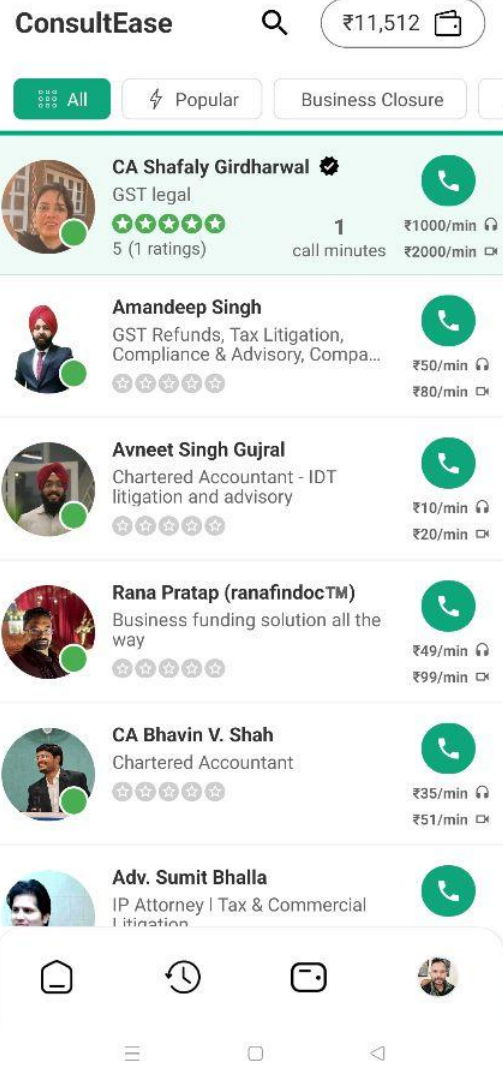

A strong, clear profile converts views into calls. Your tagline, photo and rates all affect whether someone calls you.

03

Your Availability

The platform surfaces available consultants first. Staying active and visible dramatically increases your call volume.

Be clear. Be available.
